

Print at 100% (no page scaling) and cut along the black guide lines at the corners.
This will give you a 10x5 in. (25.4x12.7 cm) board.

This page is setup so that you can fold/cut it in half, glue the two sides together, and then cut out the pieces. This will help ensure that you have them properly aligned.

Designed by Kenneth Stuart
(wizcreations)

Fold along dashed line.
Cut pieces along black guide lines.

This page is purely optional. You will need some kind of marker to use the checkpoint track along the left side of the boards. Your marker can be anything from paperclips to push pins or even bookmark clips.

Here is a simple design you can use to enhance your paperclips.
I have enclosed a few designs so that you can choose the one you like best.
